- Eliminates the need for stanchion base, freeing up valuable floor space.
- Socket allows post to rotate a full 360°, so belts can be pulled in any direction and still be straight and in-line.
- Post rotation means installation is a breeze — never again worry if socket is installed at proper angle.
- Double O-Ring keeps moisture out, preventing rust build-up.
- Air-tight seal locks post into socket, keeping it firmly in place until removed.
- Cap provides air-tight and waterproof seal when not in use.
- No special tools required.
