

Attaching a Sintra Banner to a Beltrac-grooved Post

Parts List:

Sintra Banner (1)
with Mounting Clip

Beltrac Post
(sold separately)

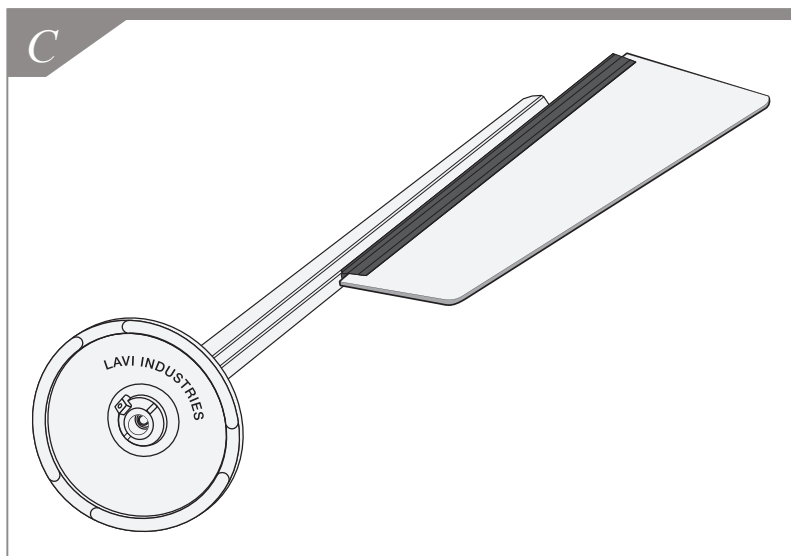

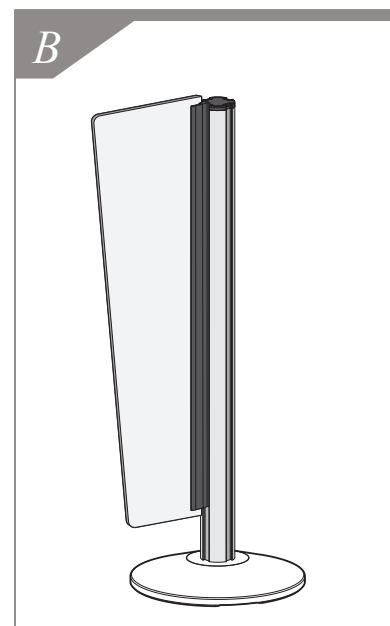

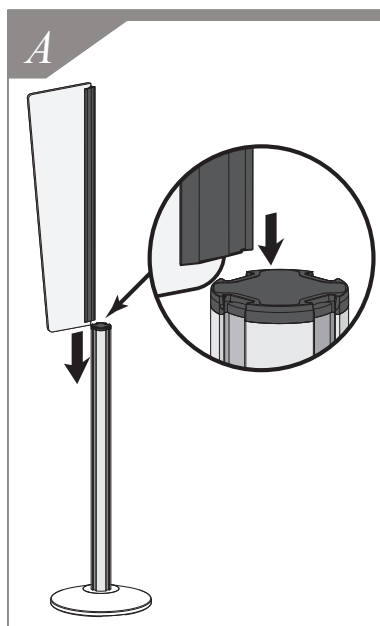

Goggles

Required Tools

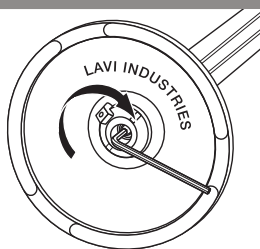

Installation Instructions

1. To attach the banner to the post, inset the banner's black plastic mounting clip vertically down and into the groove of the post (Figure A).
2. The set screw on the mounting clip will automatically align the banner with the top of the post (Figure B).

NOTE: For very large banners and tall posts, it may be necessary to use a ladder. If convenient, it may be helpful to lay a tall post horizontal to the floor during banner installation (Figure C).

ATTENTION: Over time, extensive handling of the stanchion may cause the rubber insert that holds the base to the post to loosen slightly. Should this happen, please use an Allen Wrench (5/16" Drive) to tighten the bottom hex bolt.

CAUTION: Be careful not to scratch the banner graphics during installation
