

NeXtrac® Rigid Rail

Assembly Instructions

1. Loosen the Allen head cap screw on one of the Hinge Grips of the Rigid Rail with the provided Allen wrench. This will allow for easy positioning into dovetail groove of the post. Position in the dovetail groove and tighten slightly, just enough to hold it in place. **(Figure A)**
2. Do the same with the Hinge Grip on the opposite end of the Rigid Rail, loosely attaching it to the post. **(Figure B)**
3. When properly positioned, fully tighten the Allen Head Cap Screws on both Hinge Grips to secure. **(Figure C)**
