POST & SHIELD

Ballistic Panels

Safety & Security

Features & Benefits:

- Superior protection against projectiles and blast fragments

- Portable, wheeled panels offer mobile protection

UL LEVEL 8 PROTECTION

Our Armalloy 650 panel features a certified UL Level 8 steel armor plate which can stop 7.62mm and 5.56mm projectiles. These certified plates are then coated with Encapsaloc, an anti-ricochet, anti-splatting material, which dramatically mitigates the effects of collateral damage due to ricochets and splatting.
