

Queue Guard™ Care and Cleaning

Cleaning

Proper and regular cleaning of your Queue Guard panels will help extend their life and leave them with a lustrous shine that resists fogging, repels dust, and eliminates static.

- For cleaning clear acrylic, use only commercially available plastic cleaner.
- Avoid cleaning solutions containing ammonia or alcohol.
- Some cleaners will leave a silicon layer that protects the panels.
- Use a clean microfiber towel or a lint-free cloth to clean and polish the panels.

To remove scratches, haziness, and small abrasions use a commercially available plastic scratch remover solution. With repeated use, these solution will remove scratches and restore faded and discolored plastics.

Disinfecting

- Commercially available disinfectants should be used to sanitize the panels.
- Use only non-alcoholic disinfectants.
