Lavi Metal Polish

Developed especially for high-shine or polished finishes.

Lavi Metal Polish instantly removes years of residue, rust, tarnish and oxidation from all polished-finish metals. Lavi Metal Polish applies a superstrong anti-tarnish corrosion inhibitor and imparts a long-lasting protective shine to all your metal surfaces. While it works on all metals, it is best-suited for a high-shine or polished finish.

- Easy, just wipe-on & wipe-off
- Cleans, polishes and protects
- Anti-tarnish protection
- Fresh lavender scent

NOTE: This polish is designed to remove scratches and may alter the appearance of a satin-finished or brushed metal product.

00201

Loctite 326 Adhesive

A strong structural adhesive for joining metal components. Originally designed to work specifically with brass components, this adhesive provides a cohesive bond within minutes. When working with stainless steel, expect a longer cure-time, anywhere from a few hours to overnight. If a faster cure-time is desired, use the Loctite 7649 Primer to bond stainless steel components in minutes. Loctite Metal Adhesive will simplify your project assembly while achieving a professional look.

00211

Primer for Stainless Steel

Loctite 7649 Primer is used in conjunction with Loctite Metal Adhesive for stainless steel components. Loctite 7649 Primer is sprayed or brushed on the metal as a primer to speed the curing time of the Adhesive, reducing the set-time to mere minutes during installation.

00203

MAAS Stainless Steel and Chrome Cleaner

- No powder or oily residue
- Contains no acids or abrasives
- Polishes, protects and repels dust and fingerprints

00204

MAAS Polishing Cloth

- Provides anti-tarnish protection
- Provides instant touch-ups
- Reusable
