

Lavi Industries is a world leader in the manufacture and development of innovative queue management, public guidance, and architectural railing systems. The company is headquartered in Valencia, California with additional facilities in Brewster, NY. We were founded on an entrepreneurial spirit, and our continued growth and success is a direct factor of the determination and talents of our employees. We recognize that our employees are our primary assets and we believe in providing them with a positive, rewarding work environment. Be a part of a team that pursues excellence with dedication, integrity, and service.

Jr. Application/Database Administrator

Valencia, CA

The Jr. Application/Database Administrator will report to and work directly with the Director of IT to analyze and improve processes and procedures for application development and database stored procedures, migrations, upgrades, backups, and restores. Duties include creating database schemas; monitoring and tuning databases; planning and upgrading SQL Server installations; creating procedures for fail-over maintenance; developing scripts for automation; implementing new reporting functionality; performing root cause analysis, creating and maintaining reports and documentation, and more. This position requires a multi-talented individual who is capable of wearing many hats as they develop projects across all departments.

Qualifications and Requirements:

- Microsoft Windows Server, SSRS, SQL Server, TCP/IP, VPN Technologies including Remote Access Support, Firewall
- Excellent oral and written communication skills
- Bachelor's Degree in Programming, Computer Science or Related Field.

We offer the right candidate an opportunity to develop his/her full potential in an entrepreneurial environment, as well as an attractive compensation package.

Verifiable references and drug screen/background check are required.

Equal Opportunity Employer
